Proposal to amend SANS 1418, SANS 1520-1 and SANS 1713 to include type test definition

---

It is proposed to include the following type test definitions to SANS 1418, SANS 1520-1 and SANS 1713 as follows:

type test (T)

test conducted before a type of cable (covered by this standard) is supplied on a general commercial basis, in order to demonstrate that the cable has the necessary performance characteristics for the intended application

NOTE: The test is of such a nature that, after the test has been successfully completed, it need not be repeated unless changes are made in the cable materials, manufacturing process or design that might change the performance characteristics of the cable.

This is identical to the definitions found in SANS 1507-1, SANS 1339 and SANS 97
